

PRESS RELEASE | 6 September 2021

Christophe Chabert becomes President of the Association France Energies Marines

Mr. Christophe Chabert, Director of Development Grand Ouest of EOLFI-SHELL, was elected President of the Association France Energies Marines at its General Assembly on 7 July 2021. He succeeds Mr. Julien Marchal, Director of Development, Commerce and Strategy at Naval Energies.

Christophe Chabert is returning to a position he knows well, having already held it within the France Energies Marines Association from mid-2015 to mid-2018. With his in-depth knowledge of marine renewable energies and France Energies Marines' missions, Christophe Chabert will be able to support the France Energies Marines team during its transitional phase which will see the Association's activities be wound up in favour of the ramping up of the Institute for Energy Transition, which is led by France Energies Marines' joint stock company.
