

# Point of view from an offshore wind farm developer

---

Emma Gouze, EDF Renouvelables

- Leader of offshore wind power production in France
- Initiator of an industrial sector
- EDF Renewables works with **local actors** to identify the skills available in local areas. We ensure that activities are created **as close as possible to projects**.
- stringent consideration of **environmental challenges**: numerous studies are conducted over several years, in collaboration with recognised local structures (environmental associations, fisheries committees, research laboratories etc)
