OceanSET

© Wedge Global and PLOCAN

OceanSET is a Horizon 2020 funded project which supports delivery of the European Strategic Energy Technology Plan (SET Plan) for Ocean Energy.

Duration: **3 years**

Budget: **€1 million**

Project Lead: **Sustainable Energy Authority of Ireland**

OceanSET aims to

- **facilitate technology development** for ocean energy, promote knowledge sharing and investigate collaborative funding mechanisms.
- **understand the current support activities** for Ocean Energy across Europe and determine how these can be enhanced so that the sector can evolve.
- **identify appropriate innovation programmes** which can bring ocean energy technologies to commercial deployment at an acceptable levelized cost of energy by 2025 (for tidal technologies) and 2030 (for wave technologies).
